DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP7333447 (hereinafter '447), and further in view of Applicants admitted prior art (figure 9B).

'447 discloses a arrayed waveguide grating using input and output slab waveguides having a "parabola" waveguide (Examiner notes that Applicant's "parabola" waveguide in figure 5C is the same as '447) and output characteristics as shown in figures 5-6 of '447 that meet the characteristics as claimed. The ratio of amplitude between a main and first peak appear to match the ratio in applicant's Figure 2. Furthermore, the relative phase between the two peaks of '447 in figure 5 appear to match those of applicant.
